PROFESSIONAL SUMMARY

Computer Systems Engineering student in the seventh semester at Universidad Autónoma de Aguascalientes, with a strong interest in backend and software development. Experience developing academic software projects using Node.js, Express.js, Angular, TypeScript, Python, Java, C++, SQL, and relational databases. Familiar with REST APIs, CRUD operations, database integration, authentication, Git, GitHub, Docker, and application deployment. Currently seeking an internship, social service opportunity, or junior software development position where I can apply my technical skills and gain professional experience.

EDUCATION

Universidad Autónoma de Aguascalientes — Aguascalientes, Mexico
Bachelor of Computer Systems Engineering | 2023 – Expected December 2027
GPA: **8.5/10** | Currently in 7th semester

EXPERIENCE

INEPJA — Aguascalientes, Mexico
Social Service – IT Support | 2026 – Present

- Provide technical support and maintenance for computer equipment in an institutional environment.
- Perform maintenance activities on servers and computer equipment.
- Assist with troubleshooting hardware and technical issues.
- Support daily IT operations and contribute to maintaining reliable computer resources.

Municipal Government of Aguascalientes — Aguascalientes, Mexico
General Assistant – Office Support | 2021 – 2024

- Prepared and organized administrative documents and office materials.
- Provided technical support and performed basic maintenance on computer equipment.
- Assisted citizens and supported daily administrative activities.

- Collaborated with office personnel to complete assigned tasks efficiently.

PROJECTS

Inventory Management System — Academic Full-Stack Project

- Developed a full-stack inventory management system integrating a web frontend, REST API, and relational database.
- Built a REST API using **Node.js** and **Express.js** to implement CRUD operations for product management.
- Developed the frontend using **Angular** and **TypeScript**, connecting the application to the backend through HttpClient.
- Designed and integrated a **MySQL relational database** using SQL.
- Implemented inventory management, product filtering, validation, and stock-related functionality.
- Used **Git** and **GitHub** for version control and project management.
- Deployed the frontend using **Netlify** and the backend and database using **Railway**.
- Technologies: **Angular, TypeScript, Node.js, Express.js, JavaScript, MySQL, SQL, Git, GitHub, Netlify, Railway.**

Academic Software Projects

- Developed software applications and academic projects using **Python, Java, C++, JavaScript, Angular, Node.js, and SQL.**
- Worked with relational databases and application logic in individual and team-based projects.
- Applied programming fundamentals, object-oriented programming, CRUD operations, API development, database management, and version control.
- Used development and testing tools including **Visual Studio Code, Postman, Docker, Git, and GitHub.**

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, C++, SQL

Backend Development: Node.js, Express.js, REST APIs, JSON, JWT, CRUD

Frontend Development: Angular, TypeScript, HTML5, CSS3

Databases: MySQL, SQL, Relational Databases

Tools & Technologies: Git, GitHub, Docker, Postman, Visual Studio Code, Netlify, Railway

Development Practices: API Development, Database Integration, Version Control, Documentation, Teamwork, Scrum

ADDITIONAL INFORMATION

- Interested in backend development, APIs, databases, and software engineering.
- Currently seeking opportunities for software development internships, social service, or junior developer positions.
- Available to work in a team-oriented software development environment.
